

# Implementation of MBS Navision in SYNOT W Slovakia

## Situation

SYNOT W Slovakia, Ltd. is an exclusive importer of winning slot-machines made by JPM, Gauselmann and Boss Media. It provides lease, sale and installment selling of winning slot-machines.

Existing system did not solve the security on such technical level that is provided by contemporary technologies. SYNOT W Slovakia needed IT technologies that enable optimization of business processes to be able to create competitive advantages. This optimization enabled the company to continue the service delivery on high level thanks to current creation of reliable base for usage of advantages given by technology of new business solution improvements.

## Business aims

- First of all SYNOT W Slovakia wanted a simplification and acceleration of work by MBS Navision 3.70
- Well-arranged system of analyses and controls
- Usage of Windows background
- Stress on modern system technologies
- Possibility to cooperate with other Microsoft products, particularly Microsoft Office
- One of the fundamental demands was a quality and effectively applicable module of long-term property
- Implementation of a business solution called MBS Navision also meant upgrade of hardware and programme equipment in particular workplaces

## Solution

- Implementation including analyses was carried out in three months
- Training of key and other users and transmission to routine operation
- Implementation of electronic statements given by Slovak legislation – VAT, balance, statement of profits and losses
